Super Taste

| Secret of the Real Cheese Taste

Is vegan cheese real cheese? We currently have this stigma because we are making Vegan Cheese.

Regular cheese has been made by fermenting animal protein meeting lactic acid bacteria, which is the same as our process however we replace the animal sources with plants.

We make fermentation with plant-based protein and lactic acid bacteria, also made in plants. This process naturally creates the flavor and acidity of the cheese, allowing you to enjoy the addictive taste and pleasure of having cheesy food.

It is no surprise that our vegan cheese surpasses the taste of regular dairy products, because we made the Real.

Super Vegan

| Protein

We believed that plant-based protein sources can also provide plenty of high-quality proteins. We've found the success in Almond Milk, and we're on our way to developing a formula with a very high protein content that goes beyond animal-based dairy.

Vegan Cheese

“OMG, this cheese tastes like a dream! So cheesy♥”

-Amy-

Taste

Soft with buttery flavor and a touch of sweetness.
Ideal for pizza topping, salads,
and other cooking and baking needs

Health

Made to surpass nutritional expectations,
almond milk mozzarella cheese
exceeds the original nutrients dairy milk.

Planet Protection

Almond cheese consumption protects our environment
and our animals. It contributes to reduction of CO₂ emission,
and reduces the need for large animal farms

Made from Almond Milk

First in the world to produce cheese from almond milk.
All the benefits you expect in cheese with no sacrifices
that is expected from vegan cheese. Non-GMO, Gluten free
